

DRIVER PASSWORD RESET INSTRUCTIONS

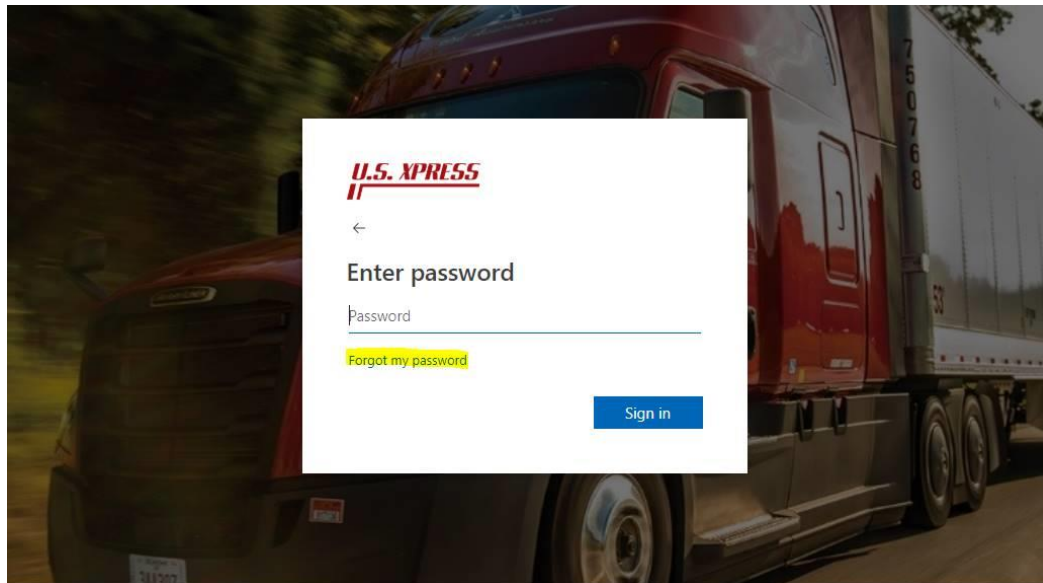

In order for your password to be changed, you must follow the reset instructions below:

Navigate to www.usxpressway.com

Click on the Professional Driver Development Site button in the middle of the page.

Once on the log in page, click on the "Forgot Password" link at the bottom of the page.

Enter your username and the CAPTCHA characters at the bottom of the screen. This verifies that you are an actual human being attempting to reset the password and not software attempting to hack in.

Once you have entered these characters, you will then be asked to choose how you would like to verify your information. Either by using the phone number or email you provided when you registered your account. It's important that you have access to this phone, or email, otherwise we will have to manually reset this information so the password can be reset.

Once you choose your preferred identification method, you will receive a verification code that must be entered to the site. This verifies your identity within the system and will then grant permission to change your password.

Once this has been changed, you should make note of the new password so you can avoid resetting it in the future.

There is a video [here](#) that shows this entire process if it's more helpful to see the steps on screen.

Please respond if you have any further questions.
